OBJECTIVE STATEMENT

Steadfast game programmer with a passion for creating solutions to complex software problems. Devout to making immersive interactive stories and refined game feel.

SKILLS

| Unreal Engine 5 | Unity | C# | JavaScript | GarageBand | 3D Printing | Autodesk Maya | Adobe Photoshop |

EXPERIENCE

William Peace University **Raleigh, NC**

Esports Lab Manager *August 2025 - Present*

- Provides software troubleshooting for esports lab computers by using terminal commands, graphics driver applications, and the Windows Registry Editor to provide faster desktop application speeds, or fixing desktop applications entirely
- Delivers high level technical support for lab hardware by consistently testing equipment such as headphones and controllers for lab upkeep
- Organizing game genre themed events that garnered large student participation

American Multi-Cinema **High Point, NC**

Theatre Crew *Summers 2024 - 2025*

- Responsibly handled monetary transactions and provide premiere customer service to guests through assisting in their requests and movie-going needs to improve their experience at the theatre
- Garnered a collaborative and supportive work environment by building positive relationships, training team members, with colleagues and management to increase teamwork and workplace morale

EDUCATION

William Peace University **Raleigh, NC**

Bachelors of Arts in Simulation & Game Design and User Experience Design *Expected, May 2028*

Honors and Awards: Trustee Scholarship, Dean's List with Distinction

Game Tech II

- Designed and implemented health systems, punching mechanics, impact frames, dodging mechanics, as well as a quick time event for both a first person and third person game using Unreal Engine 5, while refining visual scripting, level design, lighting, material creation, and particle systems skills
- Successfully implemented custom assets and playable models into Unreal Engine 5 to enact interactions and animations
- Created captivating custom main menu medieval music for previously mentioned quick time event based game using GarageBand

Peace Research Explorative Inquiry [PRAXI]

- Highly prestigious research initiative
- Learned ethical, effective research practices
- PRAXI partnered with guest speakers that apply research methods directly to Simulation and Game Design

Lecture on 3D Printing

- Invited by Simulation and Game Design professor to lead a lecture on 3D printing software
